Securing software together

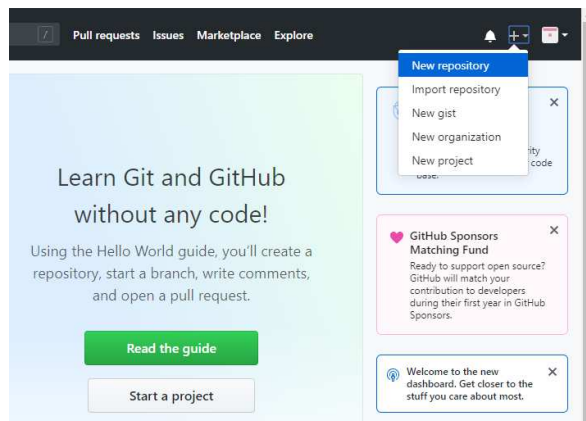

Introducing new ways to identify and prevent security vulnerabilities across your code base.

GitHub Sponsors Matching Fund

Ready to support open source? GitHub will match your contribution to developers during their first year in GitHub Sponsors.

Welcome to the new dashboard. Get closer to the stuff you care about most.

Para crear repositorios

Se rellena el formulario de creación de un nuevo repositorio. Se puede elegir la visibilidad del proyecto, y si es privado, se podrá invitar a aquellas personas que así se deseen. Además, es conveniente crear el fichero README, y editarlo posteriormente, para insertar texto (descripción, datos del alumno, etc.)

The image shows the 'Create a new repository' form. It includes fields for 'Owner' (a dropdown menu) and 'Repository name' (a text input with 'Arch1' entered). Below these is a 'Description (optional)' text area. There are two radio buttons for visibility: 'Public' (selected) and 'Private'. A red arrow points to the checkbox 'Initialize this repository with a README', which is currently unchecked. At the bottom, there are dropdown menus for 'Add .gitignore: None' and 'Add a license: None', followed by a green 'Create repository' button.

A continuación se visualiza la página principal del repositorio creado. Se puede completar el fichero README.md, que será el fichero cuyo contenido se visualizará por defecto

A partir de este momento, se puede ir creando ficheros. Se recomienda editar el fichero template.md existente en <https://github.com/adr/madr/edit/master/template/template.md> y su contenido copiarlo y pegarlo en el fichero recientemente creado
